

AI WORKFLOW AUTOMATION FOR PROFESSIONAL SERVICES

Stop spending your evenings on work that should not require you.

Professional services firms lose around 8 hours a week to admin that a qualified person should not have to do. Intake calls that go unanswered. Documents chased manually. Onboarding that happens in email threads. This document explains what we build, what it costs, and how it works.

FIXED PRICE

NO RETAINER

No ongoing fees

YOU OWN EVERYTHING

Full handover at completion

4–8

HOURS RECLAIMED PER WEEK

Per person, year one. Conservative peer-reviewed baseline — not vendor claims.

Dell'Acqua et al. (HBS/BCG, 2023) · Noy & Zhang (MIT, 2023)

<3 mo

TYPICAL PAYBACK PERIOD

At professional billing rates of £100–£300/hr and standard tool costs.

Thomson Reuters Future of Professionals, 2024

82%

SAID "IT DOESN'T APPLY TO US"

Of solo practitioners and micro-firms who haven't adopted automation. Every month that's wrong costs 16+ hours.

U.S. Chamber / SBA BTOS, 2025

WHERE THE HOURS GO

The admin is not a minor inconvenience.
It is a day of billable time, every week.

Research on professional services firms puts avoidable administrative time at around 8 hours per week per fee-earner. That is a full working day — spent on tasks that do not require a qualified professional to do them.

Intake calls that fall through because no one picked up. New clients chased for documents across three email threads. Invoices raised manually after every matter closes. Onboarding explained from scratch each time. Reports pulled together on a Friday afternoon.

None of it is complicated. All of it is time.

The most important finding in the research: the largest gains from automation consistently go to below-average performers. Bottom-quartile workers improved 43% versus 17% for top performers. Automation narrows the capability gap — it does not just help the best-resourced firms.

BCG / Harvard Business School, 2023

WHY MOST FIRMS HAVEN'T ACTED

69%

No one owns it in-firm

No one responsible for evaluating tools, sequencing the build, or maintaining it once live.

Karbon State of AI, 2025

41%

ROI uncertainty

Firms that cannot define what success looks like do not invest.

Deloitte State of GenAI, Q3 2024

36%

Integration complexity

Buying tools is easy. Making them work together is where DIY builds quietly die.

Capterra PM Trends, 2025

75%

Accuracy concerns

Legitimate in regulated work — solved by keeping a human reviewing outputs, not by avoiding automation entirely.

ABA Tech Report, 2024

WHAT WE BUILD

Specific automations for the tasks that cost the most time.

We do not sell a platform or a licence. We identify the exact tasks eating your time — intake, onboarding, document chasing, reporting — and build automation that handles them. 13 workflows across four suites. Each one built for your process, not a generic template.

Intake Suite

From first enquiry to onboarded client

#1 Enquiry & Lead Capture

Enquiries captured and scored automatically. Hot leads get an immediate personalised reply. Each enquiry becomes a contact record with no manual input. Out-of-hours chatbot option available.

#2 Appointment Setting

Clients book directly into your calendar — no back-and-forth email. Confirmations, reminders, and preparation materials sent automatically. No-shows flagged, rescheduling handled.

#3 Client Onboarding

One form from the client — everything else automatic. Folder created, database populated, engagement agreement sent for e-signature. Three-email welcome sequence. Onboarding tracker shows where every new client is.

Client Suite

Keep active clients moving without the admin

#4 Client Intake Triage

Incoming client requests categorised and prioritised automatically. Urgent matters straight to the inbox. Conflict-of-interest check runs before logging. Client gets an acknowledgement with expected response time.

#5 Client Portal Updates

Every time a matter hits a key milestone, the client gets a plain-English update — drafted and sent without you. Cuts inbound "where are we up to?" calls significantly.

#6 Invoice Generation

Invoice generated and emailed with a payment link when a matter closes or hits a billing milestone. No manual input. Records update when payment is received.

#7 Document & Payment Chasing

Outstanding documents, signatures, and payments checked daily. Four-stage escalating chase runs automatically. Stops the moment items are received. Alert fires at day 10 if nothing has moved.

Admin Suite

Run active matters without lifting a finger

#8 Document & Proposal Generation

First draft generated from client data — gated for your approval before anything is sent. Exported to PDF, saved to client folder, delivered by email.

#9 Deadline & Compliance Tracking

Every deadline monitored. Reminders at 30, 14, 7, 3, and 1 days out. Missing files trigger an alert 24 hours before. Weekly digest of everything due.

#10 Call Notes to CRM

As soon as a call ends, the transcript is processed — action items, decisions, and next steps pushed to the client record. Tasks created with owners and due dates.

#11 Reporting & Data Sync

Data pulled from your CRM on schedule, reformatted, and dropped into a Google Sheet with a plain-English commentary comparing this period against the last. Delivered to your inbox.

Retention Suite

Monetise relationships after the matter closes

#12 Client Retention & Referrals

Clients who haven't heard from you in 60, 90, or 180 days identified automatically. Personalised re-engagement emails drafted for your review. Review requests triggered 14 days after each matter closes.

#13 NPS & Satisfaction Survey

Short survey sent after every matter closes. High scorers prompted to refer. Low scorers trigger an alert so you can follow up before the relationship breaks down.

THE PROCESS

Three steps. No open-ended commitment.

STEP 01

Free Audit

A free 30-minute call. We map your current workflows, identify the tasks costing the most time, and give you a clear picture of what can be automated and at what fixed price. No obligation to proceed.

STEP 02

Build

The automation is designed and built around your actual process and existing tools. Most standalone builds ship in one to four weeks. You see it working before anything is signed.

STEP 03

Hand Over

The system goes live with full documentation and a handover call. The code, the logic, and the credentials transfer to you. No retainer. No monthly fee. You own everything.

INCLUDED ON EVERY BUILD

- Scoping call
- Build and full testing
- Complete documentation
- 30-day bug fix guarantee
- Handover call with walkthrough

NOT INCLUDED (PAID TO PROVIDERS DIRECTLY)

- Make.com subscription
- Third-party API costs (e.g. AI usage)
- Platform subscriptions
- Template and copy writing
- Running costs typically €50–€150/month depending on volume

THE COMMERCIAL MODEL

Most automation agencies build systems you depend on them to run.

We work the opposite way. Every project is fixed price, agreed before work starts. At handover, you own the system outright. No monthly fee. No platform tie-in. No automation that stops working when payments stop. If something needs changing later, you can do it yourself, hand it to anyone, or come back to us — your choice.

FIXED PRICE

The price is agreed before work begins. Scope is defined in writing. No surprises at invoice.

NO RETAINER

One-off project fee. No ongoing commitment. No monthly invoice arriving whether or not we've done anything.

YOU OWN EVERYTHING

All code, logic, credentials, and documentation transfer to you at handover. We leave nothing behind that belongs to us.

All prices are one-time project fees. Ranges are indicative — the final price depends on scope and is agreed in writing before work begins. Book a free audit call for an accurate quote.

STANDALONE AUTOMATIONS

AUTOMATION	EUR	GBP	USD
Enquiry & Lead Capture	€1,100–€2,100	£950–£1,800	\$1,300–\$2,450

BUNDLED SUITES — 15% SAVING VERSUS STANDALONE

BUNDLE	INCLUDES	EUR	GBP	USD
Intake Suite	#1 · #2 · #3	€3,000–€5,900	£2,600–£5,100	\$3,500–\$6,900
Client Suite	#4 · #5 · #6 · #7	€3,400–€6,300	£2,950–£5,450	\$4,000–\$7,400
Admin Suite	#8 · #9 · #10 · #11	€3,950–€7,850	£3,400–£6,800	\$4,600–\$9,200
Retention Suite	#12 · #13	€1,250–€2,500	£1,100–£2,150	\$1,500–\$2,900
Complete Firm	All 13 — ~25% saving	€10,250–€19,900	£8,850–£17,200	\$12,000–\$23,300

Complete Firm delivery: 6–14 weeks in sequential sprints — Intake Suite first, then Client Suite, Admin Suite, Retention Suite. Fixed price per sprint. Full documentation and handover at each stage.

30

30-day bug fix guarantee on every build. If something is not working as scoped in the first 30 days after handover, we fix it at no charge. No caveats.

OPTIONAL ADD-ONS

Extend the core workflows.

Airtable CRM Build

€3,250–€6,350

Designs and builds your Airtable CRM from the ground up — schema, views, permissions, and native automations — structured to support the full 13-workflow suite from day one. Recommended as the first build for any firm purchasing three or more workflows.

Best paired with: every core workflow

RAG Knowledge Base

€2,100–€5,200

Connects your firm's documents — templates, precedents, policy guides, matter histories — to the AI agents in agentic workflows. Instead of relying on general AI knowledge, agents retrieve and reference your actual firm content when drafting.

Best paired with: #4, #8, #9

Voice Appointment Setter

€2,550–€4,400

An AI voice agent that calls new enquiries within minutes of a form submission, qualifies them, and books the appointment directly into your calendar — without you picking up the phone. Runs continuously, including outside office hours.

Best paired with: #1, #2, #4

Client-Facing AI Chatbot

€2,100–€4,650

A branded AI chat assistant embedded on your website. Handles inbound visitor questions, qualifies prospective clients, answers FAQs from your firm content, and routes qualified leads into the automation pipeline.

Best paired with: #1, #2

NEXT STEP

Book a free 30-minute audit call.

We map your current workflows, identify the tasks costing the most time, and give you a clear picture of what can be automated and at what fixed price. No obligation to proceed. You will hear from us within one business day to confirm.

ON THE CALL

We walk through your current process. You describe what you spend your time on. We identify the three to five highest-value automations for your firm.

AFTER THE CALL

You receive a written scope and a fixed price within 48 hours. No vague estimate — a specific number for a specific build.

IF YOU PROCEED

Work starts when the scope is agreed. Most standalone builds are live within one to four weeks. You see it working before we hand it over.
